

Global Protection 2010

Enjoy total security and ensure information integrity

The new **Panda Global Protection 2010** is the most complete product, with everything you need to protect your computer and information. It protects you from viruses, spyware, rootkits, hackers, online fraud, identity theft and all other Internet threats. The anti-spam engine will keep your inbox free from junk mail while the Parental Control feature will keep your family safe when using the Internet. You can also back up important files (documents, music, photos, etc.) to a CD/DVD or online (5GB free space available) and restore them in case of accidental loss or damage. And thanks to the most innovative and new detection technologies and improved **Collective Intelligence**, the solution is now much faster than previous versions.

Enjoy total security and ensure information integrity

- ✓ Protection from viruses, spyware, rootkits, hackers, online fraud, identity theft, spam and all other Internet threats.
- ✓ Parental Control feature guaranty your family secure use of the internet.
- ✓ You can also protect all your information using the local backup or using the 5 Gb free online backup.
- ✓ Thanks to the improved Collective Intelligence technologies and the minimum impact in your PC, the solution is now much faster than previous versions.
- ✓ Panda Global Protection 2010 includes the USB vaccine technology.
- ✓ Easiest-to-use product, lightest protection.
